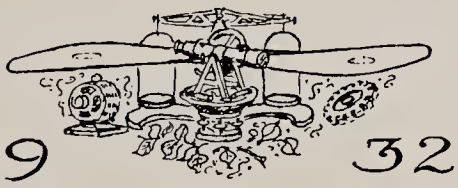
of
Tri-State College



19 32

R. W. Silver '32.

TO THE MEMORY OF

PRESIDENT CHARLES C. SHERRARD
Ph.C.M.S.

"Love Begets Love"

For thirty years Tri-State College has been uplifted by the living influence of Professor C. C. Sherrard, who throughout his life has given his unfailing devotion to the education of young men and women. May we never forget his kindliness and sympathy which never failed to mould the character of all who were fortunate enough to know him. It is with the deepest regret that we mourn his passing and to his memory do we affectionately dedicate this the ninth issue of the Modulus. May his spirit be forever with us.

Knowledge and wisdom, far from being one, have oft-times no connection.—Knowledge dwells in heads replete with thoughts of other men; wisdom in minds attentive to their own. Knowledge is proud that he has learned so much; wisdom is humble that he knows no more.

Cowper.

G. G. NIEHOUS
President

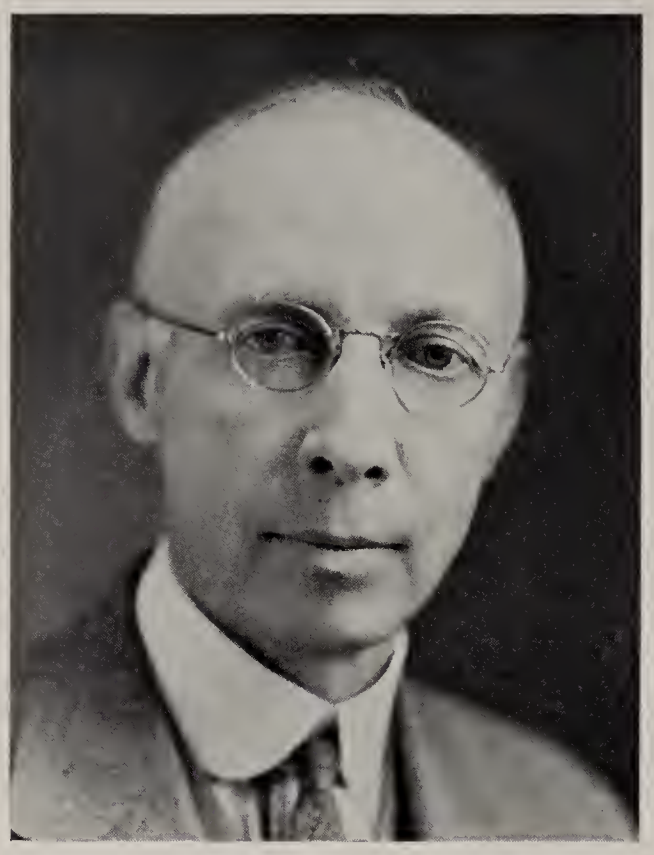
EDUCATIONAL TEMPTATION

THEY say there are many temptations in the modern college, and so there are. You will find in any worthwhile enterprise—banks, law firms, business firms, engineering offices—temptations.

The college cannot prevent temptation, but the moral duty of the faculty is to furnish temptation upward. We have teachers with personality, professional spirit, character, and a cultural background that will furnish the temptation to think, to understand, to serve, to build, to lead others, and to inspire in our students a desire to discriminate between the temptations that enrich and enlarge their lives and those which degrade and dissipate.

Someone has said, "You can lead a student to college but you cannot make him think."

When you are able to choose the *right* temptation, then your education will be of the greatest value to you.



BURTON HANDY SR.
Registrar

ACCEPTING RESPONSIBILITY

THE manner in which a man in any position in life accepts responsibility has much to do with his success or failure. The choices he makes and the paths he chooses to follow must be his own, and while it is impossible that they be infallible, still the fact that they are his own will mark him as a man of force and capability.

In the days of the persecution of the Christians by the Romans, one of the favorite methods of dealing with them was to bring an individual into the arena and place him before two doors. Behind one of these doors was a raging lion, made ravenous for the special occasion, while back of the other was a garden filled with rare flowers, fanned by scented breezes. If the poor victim chose the one door he was destroyed, if the other, he was free. With him freedom or destruction was a matter of chance only—the choice of an exit. All of us are compelled to make choices continually but, fortunately, very seldom does the outcome depend so entirely upon blind chance. Usually there are elements in the situation which may be analyzed and used to decide the issue. Particularly is this true when it is confronted by a trained man. His disciplined mind makes it possible for him to weigh the merits of different courses of action and choose the one which promises best.

Most of those to whom this book goes have already made choice of a profession in life, but many times questions arise within the profession itself, whether it be engineering, teaching, or business, which call for decision and on the decision of which depends future success or failure. Advice from friends and business associates is legitimate and should be sought out but, in the last analysis, the individual himself must stand on his own feet and exercise his own judgment as to the course to be followed. Attempts on his part to shift the responsibility to other shoulders or to place the blame for a wrong judgment on someone else only marks him a weakling and lowers the respect in which other men hold him. The really forceful men of history—those who have made an impression on men and their time—have not been afraid to assume responsibility and accept the consequences of their decisions. This straightforward attitude is one of the hallmarks of success in any line of endeavor and the lack of it, while not necessarily fatal, certainly operates to lower the esteem and confidence of all others in the person involved.

PROF. WILLIAM A. PFEIFER
Dean of the School of Engineering

HAPPINESS

EVERY individual has the right to expect a most pleasant journey throughout life's highway. Many times the road seems long and difficult to travel and the individual suspects his journey is an exception and his particular path one of the most difficult. However, such is not the case; because as one travels down the everyday road common to all of us, mistakes, alibis, and detours can never be retraced. They are recorded exactly as they occur and the record becomes permanent, from which nothing can be added or subtracted. The only way to experience a most pleasant journey is to remember and apply fundamental principles of right and wrong. Very few persons are unable to distinguish between the fundamentals of right and wrong, so it may be concluded, almost without exception, that every person has the proper directions for acquiring complete happiness. No matter what is your vocation, consider that each and every day contains an important task for you to perform; and then proceed to perform the task at hand to the very best of your ability. Upon the completion of such a journey you will have lived correctly and attained that priceless attainment—Happiness.

PROF. WALFRED LINDSTROM
Dean of the School of Commerce

INTELLIGENCE

INTELLIGENCE is the capacity to know and understand. Its biological origin is in the brain and its social significance is in its ability to absorb and dispense knowledge. It is the outstanding factor in personality and so influences the most important phases of life. As it grows and develops, spiritual discernment is made keener, health is bettered, length of life is increased and morality is improved; it is, in fact, the inner urge that recognizes the value and influence of old-fashioned virtues and calls for the highest and fullest expression of life.

The person of a big mind and soul can see far above the sordid and insignificant facts or the common relationships of life. He has the spiritual insight that enables him to properly evaluate the facts of life, to separate the good from the bad, to choose the better part, to make the adjustments of life. There is somthing within him that makes him a master, bigger than his environment and stronger than his unfortunate heritage. He can turn the teaching and examples of unfortunate training into lessons of increasing strength and character. The quality of his soul is bettered and the success of his life enhanced by his ability to choose the best.

To be intelligent is to be mentally awake and alert. The intellectual giants who stand out on the pages of history did not attain maturity of mind in a day, but through years of study and clear-cut thinking. The same possibilities of growth are to be found in each one if the inward urge or stimulus be there. Without that no great achievements will ever be accomplished. It was a higher intelligence that created the world, and that same intelligencs working through human intellect conceives great projects, dreams great dreams, sees great visions and accomplishes great things. Intelligence rules the world.

Life is the gift of nature; but beautiful living is the gift of wisdom.

Greek Adage.

LABOR

Pause not to dream of the future before us;
Pause not to weep the wild cares that come o'er us;
Hark! how Creat on's deep, musical chorus,
Unintermitting, goes up into Heaven!
Never the ocean-wave falters in flowing;
Never the little seed stops in its growing;
Till from its nourishing stem it is riven.

"Labor is worsh'p!"—the robin is singing;
"Labor is worship!"—the wild-bee is ringing;
Listen! that eloquent whisper upringing
Speaks to thy soul from Nature's great heart.
From the dark cloud flows the life-giving shower;
From the rough sod blows the soft-breathing flower;
From the small insect, the rich coral bower;
Only man, in the plan, shrinks from his part.

Labor is life! 'Tis the still water faileth;
Idleness ever despaireth, bewaileth;
Keep the watch wound, for the dark rust assaileth;
Flowers droop and die in the stillness of noon.
Labor is glory!—the flying cloud lightens;
Only the waving wing changes and brightens;
Idle hearts only the dark future frightens:
Play the sweet keys, wouldst thou keep them in tune!

Labor is rest from the sorrows that greet us,
Rest from all petty vexations that meet us,
Rest from sin-promptings that ever entreat us,
Rest from world-sirens that lure us ill,
Work—and pure slumbers shall wait on thy pillow;
Work—thou shalt ride over Care's coming billow;
Lie not down wearied 'neath Woe's weeping-willow;
Work with a stout heart and resolute will!

Labor is health! Lo! the husbandman reaping,
How through his veins goes the life-current leaping!
How his strong arm, in its stalwart pride sweeping,
True as a sunbeam the swift sickle guides!
Labor is wealth—in the sea the pearl groweth;
Rich the queen's robe from the frail cocoon floweth;
From the fine acorn the strong forest groweth:
Temple and statue the marble block hides.

Droop not, though shame, sin, and anguish are round thee!
Bravely fling off the cold chain that hath bound thee!
Look to you pure Heaven smiling beyond thee;
Rest not content in thy darkness—a clod!
Work—for some good, be it ever so slowly;
Cherish some flower, be it ever so lowly;
Labor!—all labor is noble and holy!
Let thy great deeds be thy prayer to thy God!

Frances Sargent Osgood

SENIORS

THE SENIOR CLASS OF 1932

The graduating class of 1932 launched itself on its final voyage to Commencement Day under the leadership of Thomas Hettema, President; Ted Beckman, Vice President; Jules Cullen, Secretary; and Duncan Smith, Treasurer. The meeting was opened with an address by Professor Handy who gave the class a talk on what to expect of its officers. Election of the above officers was then held. Immediately afterwards the class committees were chosen to help carry on the work of the class organizations.

The first meeting was held to announce the members of the committees and to elect a class advisor. By a unanimous vote Professor Parrott was chosen as class advisor. She gladly accepted the task and expressed her willingness to aid the class in every way possible.

To date, two meetings have been held and, from the committee reports which came in, much has been accomplished. As a tribute to the late Dr. Sherrard, the memorial committee chose to present the school with a large portrait of him.

The banquet and dance committee has arranged for the big affair to be held at Pottawatomi Inn. This is a traditional party in which all the faculty and the graduates with their friends get together for a big time before the seriousness of commencement day holds the spotlight.

The program committee is working on the plans for a complete week of activities for the graduates beginning May 30.

Pins, class colors, dance programs and invitations have all been decided upon.

Such is the type of the class of 1932. Active and full of pep for getting things completed. Harmony is the basis for an efficient organization and the class of 1932 will long be remembered for this trait under the leadership of President Hettema.

He who loves his country can love nothing else.

THE ENGINEERS

Who is the man who designs our pumps with judgment, skill and care?
Who is the man that builds 'em and keeps 'em in repair?
Who has to shut them down because the valve seats disappear?
The bearing-wearin', gearing-tearing, mechanical engineer.

Who buys his juice for half a cent and wants to charge a dime?
Who, when we've signed the contract, can't deliver half the time?
Who thinks a loss of twenty-six percent is nothing queer?
The volt-inducing, load-reducing electrical engineer.

Who is it takes a transit out to find a sewer to tap?
Who then with care extreme locates the junction on the map?
Who goes to dig it up and finds it nowhere near?
The mud-bespattered, torn and tattered civil engineer.

Who thinks without his products we would all be in the lurch?
Who has a heathen idol that he designates research?
Who tints the creeks, perfumes the air and makes the landscape drear?
The stink-evolving, grease-dissolving chemical engineer.

Who is the man who'll draw a plan for anything you desire?
From a trans-Atlantic liner to a hairpin made of wire?
With "ifs" and "ands," "how'ers" and "buts," who makes his meaning clear?
The work-disdaining, fee-retaining consulting engineer.

Who builds a road for fifty years that disappears in two?
Then changes his identity so there's no one left to sue,
Who covers all the traveled roads with filthy, oily smear?
The bump-providing, rough-on-riding highway engineer.

Who takes the pleasure out of life and makes existence hell?
Who'll fire a good-looking one because she cannot spell?
Who substitutes a dictaphone for a coral-tinted ear?
The penny-chasing, dollar-wasting efficiency engineer.

Who are the boys who shudder when a highbrow heaves in sight?
Who are the boys who chase the "X" with fuming main and might?
Who are the lads who grease the earth and smooth the course of years?
The slipstick-sliding, art-deriding, hard-boiled engineers.

—Author Unknown.

SIGMA ALPHA GAMMA

Beta Chapter

We shall love you not when fortune chains are around thee,
Not when hopes the brightest shine,
Not when pleasure's trains surround thee,
And their beaming smiles are thine.

Not when earth is full of brightness,
Not when skies the fairest prove,
Not when life is full of lightness,
Will we give our warmest love.

But when your cheeks have lost their brightness,
And your eyes their lovely hue.
When your hearts have lost their lightness,
Then we will fondly cling to you.

When the beams of hope are vanished,
And the chains of fortune lost,
And the trains of pleasure banished,
Then it is we will love you most.

Why do you suppose sororities exist? We believe it is a satisfaction of a longing which most of us have for a unity of purpose, for fellowship, genuine friendship, and the feeling that someone needs us, for the interchange of ideas, and, primarily, as a result of the gregarious instinct peculiar to the majority of individuals. Then it does satisfy a need, does it not?

Beta Chapter of Sigma Alpha Gamma Sorority was organized at Tri-State College in November, 1926, the second chapter of a national sorority for commerce students, with seven charter members, one of whom is now an active member. A few new members were taken in and several went inactive during the two years that followed.

During the fall term of 1929 through the efforts of remaining active members a series of parties was held resulting in the initiation of nine pledges into Beta Chapter. This marked the beginning of a steady growth of the chapter, nine more entering during the following year.

At the close of the fall term of 1931 a banquet was held at the Green Apple Tea Room honoring three new sisters, Mrs. Ruth Mason, Opal Wright and Marie Gibson.

National rules and regulations coupled with the removal of the Secretarial courses from the Commerce School have placed a serious handicap upon Beta Chapter but despite all this we see no reason why we shall not continue to hold to our high standards and surpass past records.

The officers for 1932 are: Louise Gabriel, President; Geneva Henney, Vice-President; Ruth Mason, Secretary; Opal Wright, Treasurer; Eleanor Tarbell, Sergeant-at-Arms; Jeanette Green, Social Chairman; Helen Schinbeckler, Shield Reporter.

PHI SIGMA CHI
Delta Epsilon

The Phi Sigma Fraternity was founded in Zanesville, Ohio, on November 28th, 1901. As originally founded, the fraternity bore the name of Delta Theta Omega. In May, 1902, organization was begun, and simultaneously with the revision of the constitution and ritual, the name Phi Sigma Chi was adopted. The fraternity has grown, and is now nationally known, having a total of one hundred and eighty-seven chapters.

Delta Epsilon chapter was organized and admitted to membership in the Phi Sigma Chi during the Fall of 1927. The founders of this chapter had to sacrifice much time and energy to compete with existing organizations at Tri-State College. With the upholding of the high standards of our fraternity, and the splendid co-operation of every brother, we have succeeded in taking our place with the leading fraternities on the campus.

The pledgeship of this fraternity is really a probationary period for a prospective member. During this period his actions, character, and general attitude are observed carefully. Pledging is referred to commonly as hazing and sometimes carried to an extreme. It is true that certain phases of pledging seem foolish and unnecessary but it is necessary, not only to see if the pledge has the will power to go through and complete a job that is distasteful; but also to see that he takes it in good grace. We do not believe in unnecessary berating a pledge, nor do we believe in too long a pledgeship. To become a member of this fraternity requires hard work, as the pledge will attest; but appreciation of the real things in life calls for hard work.

By choosing men of high caliber and good scholastic standing, we hope to continue progressing as we have in the past; always with the idea of scholarship and fraternalism foremost in our minds.

To our graduating brothers, we wish to extend our sincerest wishes for success in their line of endeavor. May the spirit and goodfellowship of their Phi Sigma Chi days be their guide and incentive for the choosing of friends and companions who will help to make them better men in the years to come.

BETA PHI THETA
Delta Chapter

Beta Phi Theta Fraternity was founded at the Milwaukee State Normal School in November, 1917. It was the first social fraternity at the Normal School and during the five successive years flourished as a local organization. In 1923 plans were made for expansion, and when the first national convention was held in June, 1924, three chapters responded to the roll call. Since that time other strong local fraternities have become affiliated with Beta Phi Theta.

In 1922, a group of men organized "The Four Eleven Gang", to promote good fellowship among themselves. The organization proved to be successful that they decided to expand, in an effort to give other students the opportunity to enjoy this relationship. It was at this time that Lamda Phi Epsilon was born. The membership of this fraternity grew, and recognizing one of the great needs of the students, opened in 1925, the first fraternity house on the campus of Tri-State. Then in 1929, when the college recognized fraternities, the Lambda Phi Epsilon became Delta chapter of the Beta Phi Theta Fraternity.

Delta chapter has not lost sight of the primary reason for our presence here at Tri-State, therefore, the men chosen for our fraternity are scholars and leaders. Through this method of choice there has been banded together, men whose cause is the same, and whose brotherhood and leadership is outstanding. We are indeed proud that we have men in the staffs of the Modulus and the Integral; men holding offices in the Engineering Society and Commerce Club; members of the Dramatic Club and the Tau Sigma Eta Honorary Society; and that the senior class president is a man of our brotherhood. We have attempted to maintain a high scholastic standing; to develop the man that is in us; to have in our group a just share of the leaders on the campus; and it is with quite a bit of pride that we can say that this year has been one of high success for our fraternity.

There is no doubt but that the college education is of inestimable value to a man, but the ability to live with, understand and lead his fellowmen is just as important to him. Beta Phi Theta men have the opportunity of building into their character these two great values. We are aiding Tri-State in the building of men—men who are to be our leaders of tomorrow.

We who are graduating will always cherish the memory of our brothers and what our life here has taught us. We who remain must continue in our leadership, our scholastic standing, and our brotherhood. Delta chapter of Beta Phi Theta can boast of the finest brotherhood on the campus; and so it will remain. Let us so live that our lives will be in harmony with the crest that graces the plate on the opposite page.

ALPHA DELTA ALPHA
Eta Chapter

On the thirty-first of March, 1924, seven members of the I. O. O. F. who were students of Tri-State College and who saw the need of a fraternity fostering certain ideals, founded Phi Lambda Tau fraternity. These ideals were Brotherly Love, Honor, Truth, Integrity, Education, Courtesy and Mutuality. The Angola I. O. O. F. supported them in their early growth and extended them some very helpful assistance.

A state charter was granted to Phi Lambda Tau on April 10, 1925. On January 1, 1929, they moved to their quarters on the public square. These rooms were soon after completely refurnished and redecorated.

The step which was taken in securing and improving the fine new club rooms, was a step for progress, but it did not end there. Realizing that there were many advantages in being affiliated with a national organization, they chose as their next step in their progressive program, to petition some high standing national collegiate fraternity. After much deliberation and discussion on the subject, a petition for membership was sent to the Alpha Delta Alpha Fraternity. Fortunately the petition was accepted and plans for the installation of the local chapter were made.

On May 2, 1930, Eta chapter of Alpha Delta Alpha was duly installed, and authorized to function as a chapter, by the National President and his assistants. The men who had been members of Phi Lambda Tau, twenty-eight in number, were given the ritual as charter members of the new chapter. Immediately after the charter members had completed their ritual work, sixteen new men were admitted to membership, raising the number of active members to forty-four. These men proceeded to function as Eta chapter of Alpha Delta Alpha with the same zeal and progressive spirit which characterized the old Phi Lambda Tau Fraternity.

Alpha Delta Alpha has its foundation in a radio club formed at Coe College, Cedar Rapids, Iowa, in 1919. In 1920 the organization and name was changed to Alpha Delta Alpha, a scientific professional fraternity. In August, 1926, it dropped its science requirements to be hereafter a national collegiate social fraternity.

At the present time this praternity consists of eight chapters located at recognized first class colleges in the middle west. Due to the fact that the expansion program is very conservative, progress in securing new chapters has not been rapid, but at the present time there are several local fraternities under consideration.

On March 20, 1932, Eta chapter of Alpha Delta Alpha abandoned the rooms on the square and moved into their new house at 613 West Pleasant Street.

As in Phi Lambda Tau, so now in Alpha Delta Alpha, our ideals are, a perfect brotherhood and a complete knowledge of all things worthwhile.

SIGMA MU SIGMA
Alpha Chapter

Alpha Chapter, Sigma Mu Sigma, was founded at Tri-State College on Good Friday, March 25, 1921, by three students of Masonic affiliation who saw the great possibilities in store for the furtherance of true Masonic fraternalism. With the aid and combined enthusiasm of nine other Masons, who were also students on the campus, this chapter was duly formed.

Man is a social creature and this fact is responsible for the establishment of associations by and between men. These associations or social relations are instigated by a mutual desire for and an actual need of fellowship. When such a desire is laudable and such a need is sufficiently urgent, there evolves from the subsequent situation, such an organization as Sigma Mu Sigma.

Nowhere is there a more beautiful philosophical pronouncement than the injunction of the Gallilean, "Love thy neighbor as thyself." Society, in its necessity, intermingles men and motives, needs and desires. Modern society has classified and specialized until it has given to the individual a singleness of purpose and often a dis-association from conscious relationship to the whole, but this single function is a single building stone in the massive wall of society. If this stone is warped or rough it mars the features of the whole structure; if it is weak it weakens the structure; if it is strong it must be surrounded by strength to function properly. This is true of the material society. A man's happiness and well-being is largely dependent on his love for his neighbors. It is the spiritual cement of society.

Nowhere is the philosophy of love for one's neighbor, loyalty to duty and to ideal, reverence of the divine and obedience to law more deeply rooted than in the heart of the true Mason. No system of philosophy or method of training will better fit a man to perform his duty to the society in which he lives, to render loyal service to his country and measure up to the most exacting standard of good citizenship, to build and maintain in all the glory of its true significance that most sacred of human institutions, the home, than the imbibing of the soul of Masonry and the exemplifications of its precepts in the striving of man toward the ideal of perfection.

The aim and function of Sigma Mu Sigma on the college campus is to create a well balanced college fraternity. It is based on scholarship and aims to develop the intellectual side. It is, however, a general fraternity and not purely a scholarship fraternity. We are striving to attain a high standard of scholarship for a social fraternity by concentration on that as one of our cardinal principles and giving our best efforts to building up that ideal.

DELTA KAPPA PHI
Kappa Chapter

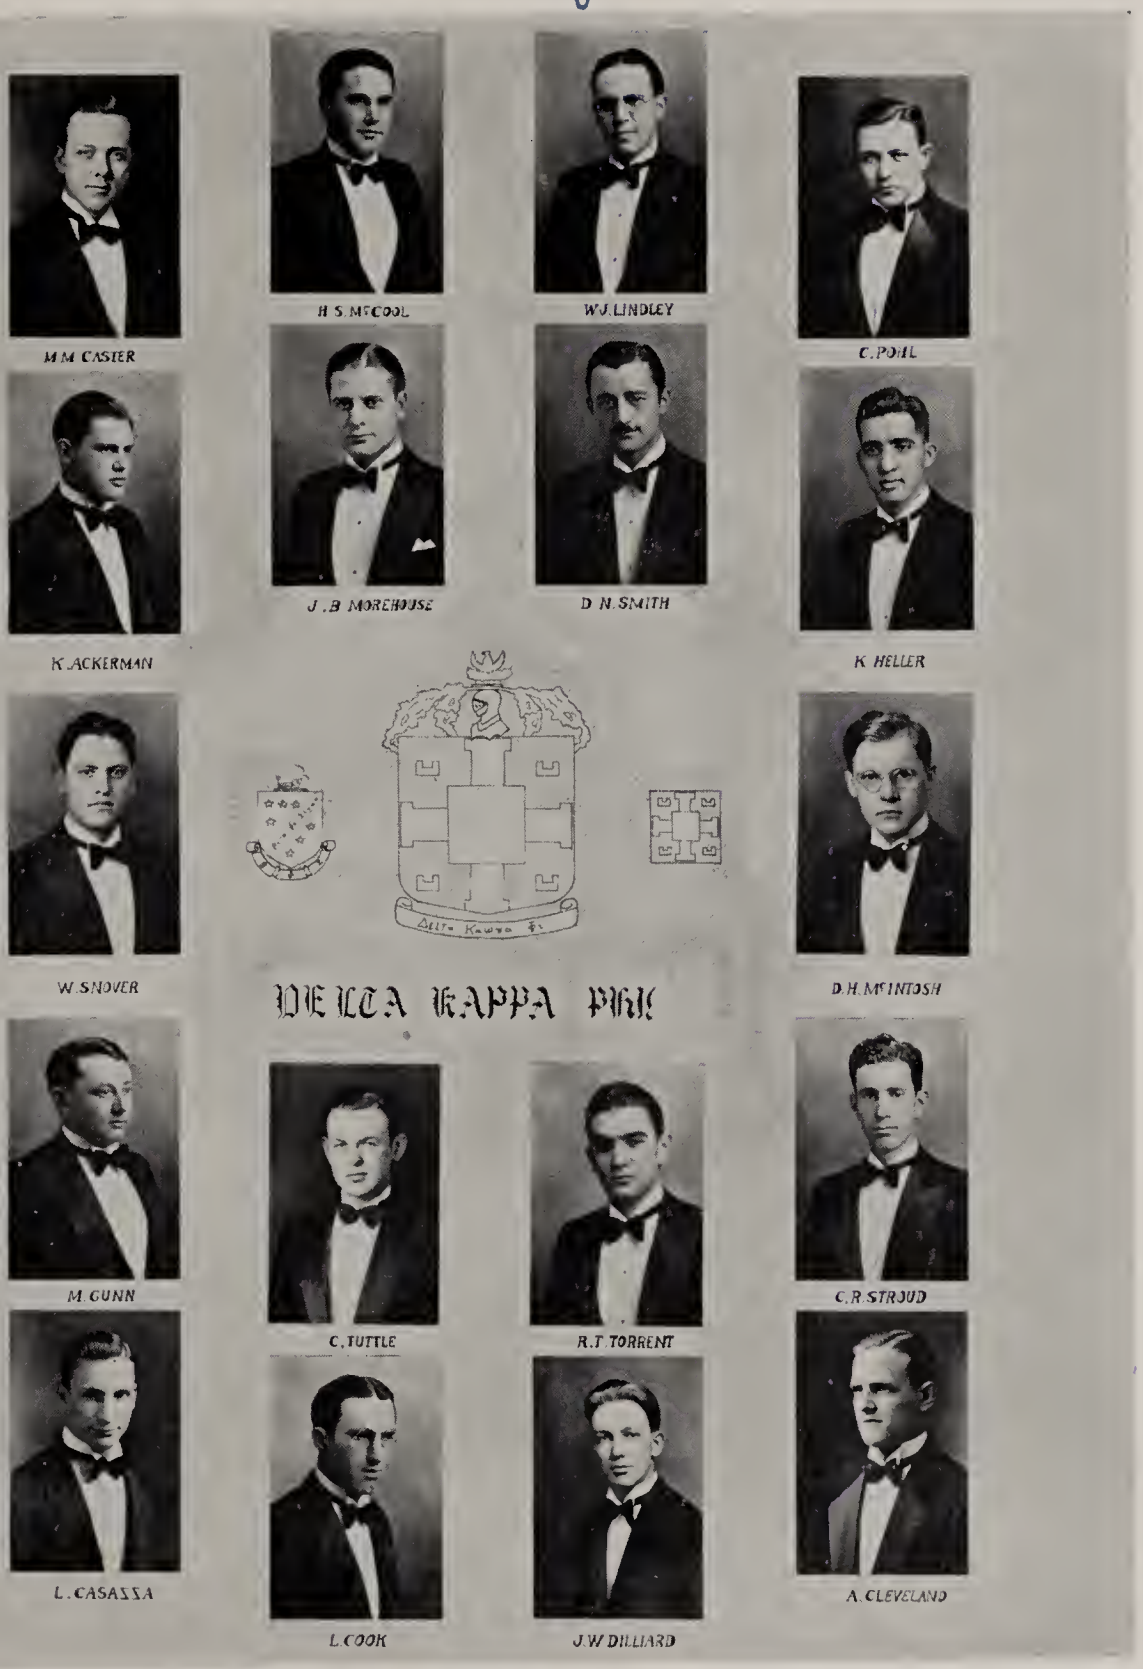
The Kappa Chapter of Delta Kappa Phi Fraternity, which is located on the campus of Tri-State College, Angola, Indiana, was founded on the sixth day of February, 1932.

For ten years this chapter had been functioning on the campus as a local, Beta Phi Sigma, Tri Alpha Chapter. At the decision of the Board of Directors of Tri-State College, that every Fraternity on the campus must be affiliated with a National Collegiate Fraternity, Delta Kappa Phi was petitioned. After a year of hard work and petitioning a charter was granted by the grand chapter. Our chapter role is, Alpha, Marshal College, Huntington, W. Va.; Beta, Bucknell University, Lewisburg, Penn.; Delta, College of Idaho, Caldwell, Idaho; Epsilon, Cumberland University, Lebanon, Tennessee; Zeta, University of Utah, Salt Lake City, Utah; Eta, Utah State Agricultural College, Logan, Utah; Iota, Detroit Institute of Technology, Detroit, Michigan; Alumni Alpha, Nashville, Tennessee; Alumni Beta, Caldwell, Idaho; Alumni Delta, Lewisburgh, Penn.

The members of the Delta Kappa Phi Fraternity on the Tri-State Campus have always been prominent in the Engineering Society, Commerce Club, staffs of the Modulus and Integral.

Today we have a fourteen room fraternity house of which we are most proud, and for which we are indebted to our preceding brothers. We operate our private dining room so that we may enjoy home cooking as well as lending that homelike atmosphere to the house. Our social functions consist of house parties, banquets, and our Annual Spring Frolic, which is held the latter part of May each year. Each event affords us much real enjoyment and recreation, as well as social education which is so valuable in later life if one is to attain a high degree of success.

Warren J. Lindley



PHI BETA EPSILON

Phi Beta Epsilon was established at Tri-State College on January 1st, 1930, as a local intercollegiate social fraternity. We have the distinction of being the youngest fraternity on the campus; and yet during the two years we have been active, we have climbed to an enviable position among the other fraternities.

It is with pride and satisfaction that the founders and susequent brothers have built up the organization, and have watched it grow from a small group of men who realized the need of a medium to promote student contacts and fellowship, and who realized that something deeper than mere fellowship was needed, something stronger: A Brotherhood—Phi Beta Epsilon Fraternity.

A sailing vessel without wind can travel nowhere. It requires a force to move it forward. Without a rudder, however, the ship cannot be directed; and the forces drive it from one place to another—it seldom reaches its objective. Phi Beta Epsilon was fortunate in having a group of men, such as its founders, who were able to realize this fact. Other men were invited to share the social advantages of the organization and under the leadership of the type of men solicited, the fraternity has risen to a place of prominence on the campus.

We live to grow and build. We must never stop moving forward; for when we do we are moving backward, and when we move backward we perish. It is impossible for a man to remain stationary in life when once he has been instilled with enthusiasm to work for, and guide the destiny of the fraternity. Ambition, intiative, and the desire to move onward take root in these men making them better fitted for the places in society, they will occupy when they leave school. Scholastic standings must be maintained. As a result these men are spurred on to more serious thought which is relieved by the society which can only be afforded by true brotherhood and the spirit of fraternalism.

Phi Beta Epsilon looks upon the future with enthusiastic anticipation. Our ship is being driven by a strong wind. At the wheel is a group of men capable of driving her through any and all storms. Our objective to grow and build is ever before us and while we are building a better and stronger fraternity we too as individuals, are growing and building—growing broader, wiser, and with a greater feeling of self confidence—building personality, ambition, and a keen deseire to take our place in the world.

Your activities must never cease, Phi Beta Epsilon, and your spirit of youth and fellowship shall be carried around the world.

PHI DELTA KAPPA

Gamma Chi

Early in the year of 1920 a fraternal organization known as the Delta Lambda Xi, came into being. It was the first of its kind in Angola. As its purpose was to foster good fellowship, it consequently thrived, and in due course of time decided to link up with a nationally known fraternity.

The organization, having decided to accept admission to the greater Phi Delta Kappa Fraternity, on March 13th, 1922.

The charter members of this new Gamma Chi Chapter of Phi Delta Kappa were, E. E. Bergen, Ronald Owens, W. O. Blakely, O. P. Carrol, Harcourt Sheets, Bernard Walker, F. G. Berquist, Philip E. Hedges, H. E. Smith, Herloth S. Ryder, O. A. Bassett and Lyle M. McBride.

Brothers who have joined our ranks since the date of its birth are far too numerous to mention individually. However, we wish to say, that they are wonedrful fellows, always Phi Delts, neved forgotten and we wish them all, the greatest success in life.

It is the spirit of the fraternity to contribute their services to the general welfare of the public and particularly to the community in which the chapter is located.

Our Annual Spring Frolic held in May, 1931, was by far the greatest social achievement ever credited the chapter. There were approximately one hundred couples in attendance, many of the brothers coming several hundred miles to be with us for what has become the greatest occasion of the year.

The dance was held at the Anthony Hotel in Fort Wayne. Breakfast was served, novel entertainment introduced, and well—a most enjoyable time was had by all. Congratulations poured in from all the neighboring chapters. At this time the 1932 Frolic is already being arranged for. It is our sincerest wish and fondest hope to even surpass our 1931 effort.

The Gamma Chi Chapter is now led by college men who have the benefit of the fraternity and the promotion of the highest scholarship at heart, who conscientiously perform their duties as officers, fostering good fellowship and fraternalism among the brothers. The officers for 1932 are: President, Ralph S. Reade; Vice-President, Donald J. O'Connell; Secretary-Treasurer, Homer A. Hott; Master of Ceremonies, Leonard L. Shultz.

PHI IOTA ALPHA

Iota Chapter

The origin of this organization dates back to 1921 when it started its activities as the Club Hispano-Americano, composed totally of Spanish-American students attending Tri-State College. After six years of existence, it was registered under the laws of the State of Indiana as the Gamma Eta Alpha Fraternity.

Not contented with our success in the territory of Angola, Indiana, an active extension campaign was started by its members, which culmination with the fusion to the Phi Lambda Alpha Fraternity as the Eta Chapter. This fraternity, whose ideals were our own and whose views similar to ours, and having five chapters throughout the most important Universities of the East, represented our goal. Then uniting our efforts with theirs, we carried on our campaign going from one success to another. On December 26, 1931, and in our Annual Convention held in the city of Troy, N. Y., the Phi Lambda Alpha merged to the Sigma Iota from the South, to form the Phi Iota Alpha, being the strongest Spanish organization of its kind in America, with ten Chapters in the leading Universities of the United States.

The aims of this fraternity are to bring into a more perfect fraternal embrace the Latin-American countries and to foster between its members a better sense of duty and study.

TAU SIGMA ETA

Honorary Society

For many years the college has lacked a way to award honors to individual students who have attained high scholastic standing and distinctio non the campus. In December, 1929, by popular vote of the Engineering Society, it was decided to sponsor an Honorary Society, to fill this much needed requirement of distinction. In January, 1930, plans were made for the organization of such a society, and a constitution drawn up. In April, 1930, a charter was granted by the State of Indiana to Tau Sigma Eta, functioning at Tri-State College as a local collegiate Honorary Society.

The student who receives unusually high grades in his scholastic work and receives the approval of the faculty advisors, may become a member of the society. Seven members are chosen each term by this procedure. The student may also acquire membership by distinguished work on the campus such as, being outstanding in the Engineering Society, or some of its functions; as the publications, stunt nite, banquet, etc. Three members are thus elected each term.

Like all local organizations, the chief ambition of the society is expansion by being affiliated with some national collegiate honorary.

Faculty advisors: Prof. Luther Ott, Prof. John Humphries, Prof. Gerald Moore, Prof. Burton Handy.

Sitting from left to right, front row: Fred Vivenzio, Anthony Mascali, Frank Townsend, Eldred Phillips, R. K. Naylor, C. McFerrin.
Standing from left to right, rear: Prof. Lower, Carl Gustafson, H. Mueller, B. Shoffer, John Sudol, J. Rumisek. Not represented in the picture, W. Finster.

CHI EPSILON HONORARY SOCIETY

Chemistry has always entered into every phase of our material existence, from pre-historic times down to our twentieth century civilization. Chemistry is the foundation of almost every science; and the higher our civilization develops the greater will be the future of chemistry. Chemistry has seen the rise and fall of nations, has witnessed internal strife, and has been the chief factor in the moulding of nations. This age of chemistry is calling for men of patience, integrity, and genius—in short the type of men who stand for the ideals of Chi Epsilon.

The monorary chemical society, Chi Epsilon, is one of the main cogs in the Chemical Engineering Course. Its members are men of high scholastic standing and ability, whose chief interest is the welfare of chemistry.

Its founder, the late Doctor Sherrard, was widely known for his activities and pursuits in the realm of chemistry. His ceaseless efforts to make the society become an important factor for the chemical student have been realized. The society has now become one of the outstanding student organizations of the campus, and promises to perpetuate the ideals of its founder.

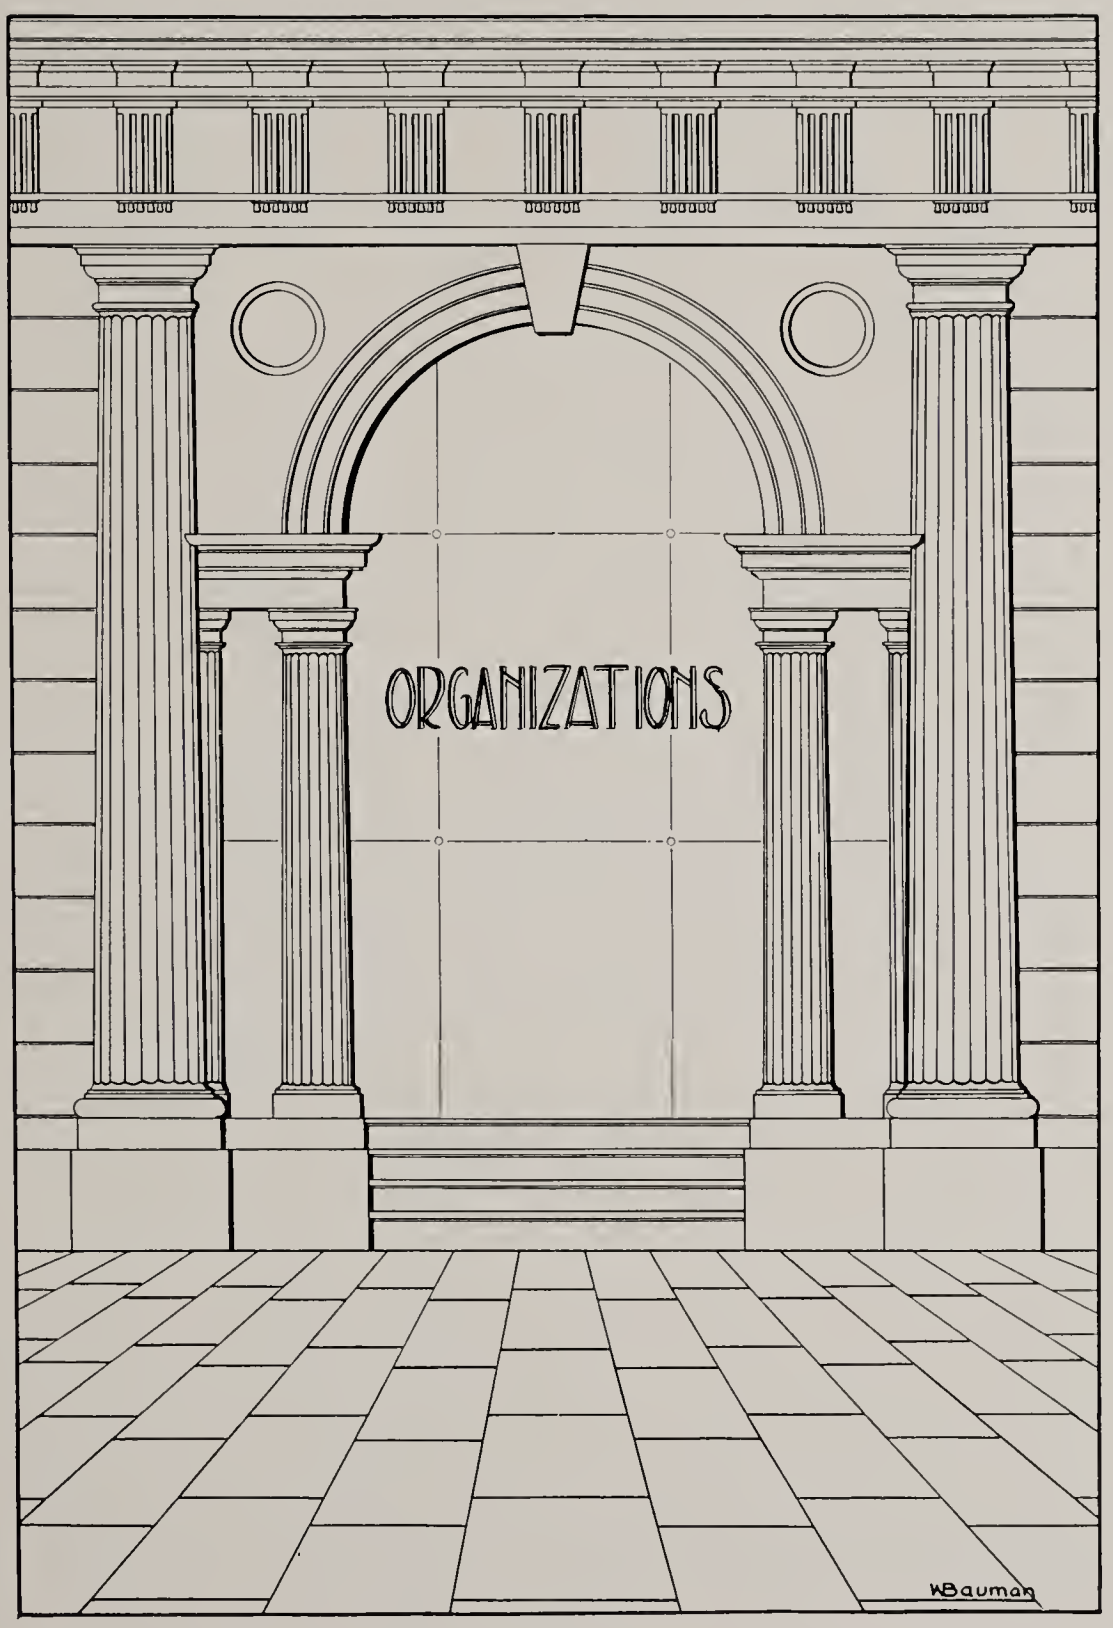
THE FRIEND

Of all the heavenly gifts that mortal men commend,
What trusty treasure in the world can countervail a friend?
Our health is soon decayed; goods, casual, light and vain;
Broke have we seen the force of power, and honor suffer stain.
In body's lust man doth resemble but base brute;
True virtue gets and keeps a friend, good guide of our pursuit,
Whose hearty zeal with ours accords in every case;
No term of time, no space of place, no storm can it deface.
When fiickle fortune fails, this knot endureth still:
Thy kin out of their kind may swerve, when friends owe thee good-will.
What sweeter solace shall befall, than (such a) one to find
Upon whose breast thou may'st repose the scerets of thy mind?
He waileth at thy woe, his tears with thine be shed;
With thee doth he all joys enjoy, so leef a life is led.
Behold thy friend, and of thyself the pattern see,
One soul, a wonder shall it seem in bodies twain to be;
In absence present, rich in want, in sickness sound,
Yea, after death alive, mayst thou be thy sure friend be found.
Each house, each town, each realm, by the steadfast love doth stand;
While foul debate breeds bitter bale in each divided land.
O Friendship, flower of flowers! O lively sprite of life!
O sacred bond of blissful peace, the stalorth staunch of strife!

—*Nicholas Grimoald.*

We are members of one great body, planted by nature in a mutual love, and fitted for a social life.—We must consider that we were born for the good of the whole.

Seneca.



ORGANIZATIONS
W Bauman

THE ENGINEERING SOCIETY

The activities of the Engineering Society during the summer term were slowed up somewhat by the excess heat which had a tendency to drive us lake-ward. It was during this term that our present constitution was revised, as well as several other major changes in the organization. Finding that Mr. Peterson, our President, was a very capable leader, he was re-elected our President the fall term.

The Society again resumed much activity during the fall term of college. Our annual Stunt Night show was held under the direction of Charles Shank, director of the Dramatic Club. Roy Clark made a very fine job of managing the Stunt Nite parade. Both the parade and the show were a huge success and the Society sincerely thanks all those who aided in its success. The Civil Engineering students are to be congratulated for the attractive prize winning float which they had in the parade. All campus organizations cooperated and we thank them.

Mr. Webster was elected to the office of President for the winter term. During this term the annual Engineers Banquet was held which celebrated the Silver Anniversary of the Tri-State Engineering Society. Mr. Fenwick was chairman of the Banquet Committee and did much for its success. We honestly believe that during this term our Vice-President, Mr. Ravenstein broke all records for securing lecturers, pictures and entertainment which we all anjoyed. Mr. Kovach, Editor of the Integral, published two most interesting issues.

This spring term we have as our leader Mr. Cullen. The staffs of the Integral and Modulus are both very busy, determined that their respective publications will be outstanding. Both the Integral and Modulus have shown their esteem for the late Dr. Sherrard by dedicating an issue of each to him.

With the approaching Commencement Exercises we are about to lose several of our faithful members due to their graduation. We have greatly appreciated their support in the Society and wish them success in the future.

Left to right, first row: L. McNight, C. Ganss, Prof. Handy, B. Caler, and H. Hott.
Second row: J. Moffitt, A. Muir, R. Carson, W. Webster, C. Rhine, D. Crisman, E. Gilcher, D. Dober, and H. Chaffin.
Third row: F. Lennox, W. Willhyde, S. Groves, M. Shapiro, C. Billings, and P. LaFrance.

DRAMATIC CLUB

The Tri-State College Dramatic Club was organized during the Fall of 1930. The club made its first public appearance, when the members presented a Christmas Chapel program a short time after its organization.

Since its organization the club has weathered many storms. It is now sailing on a calm sea, which according to weather reports, will be calm for a long time to come.

The club is under the direction of Charles E. Shank, who guides the members in their dramatic technique, outlines the programs, and directs the club's productions.

The plays given by the Dramatic Club up to this time are as follows: Everyman, an old morality play, which was presented at the first Christmas Chapel. Booth Tarkington's "The Trysting Place," Stuart Walker's "Nevertheless" and "The Medicine Show" were given the following term. "Don Juan's Christmas Eve" and "Creatures of Impulse" were played at the second Christmas and Easter Chapels. Original sketches and short plays for special entertainments have been given from time to time.

Every club meeting is made entertaining by a good program presented by either members or guests. During a student's membership something is learned about every angle of dramatics from stage lighting to playwriting.

L. D. Barto Pa.

Left to right, first row: F. Stevens, L .Geiger, H. Brown, Professor Harshman, C. Knadler, J. O'Hara, and H. Oswalt.
Second row: W. Wampler, A. Donaldson, J. Evans, W. Burton, M. Shapiro, L. Borton, J. Robinson, and M. Meyers.
Third row: J. Schultz, C. Widdowson, L. Barto, J. Herrick, I. Shank, G. Fogle, and G. Baker.

COLLEGE GLEE CLUB

President, John L. Schultz; Vice President, Arnold Donaldson; Secretary, Jack Herrick; Librarian, Wayne Burton.

Two years ago a Glee Club for male voices was organized on the campus for the purpose of cultivating an interest in music and providing for the expression of this interest. This Glee Club through its numerous engagements, both in Angola and outside cities, has aided in development of a friendly feeling between the students and the people of these communities. Among thse "goodwill" tours wre trips to Coldwater, Mich., Pioneer, Ohio, and Fort Wayne, Indiana.

Since its inaugural, the Glee Club has made great strides. It is now one of the largest organizations on the Tri-State campus. The students comprising the Glee Club have derived much benefit and pleasure under the leadership of the popular and competent director, Professor A. G. Harshman.

Left to right, first row: A. Cabal, W. McTeague, F. Drewniany, W. Porter, Father Finnegan, J. Cullen, S. Blaszyk, and T. Sabastiano.
Second row: H. Flannery, E. Schappert, B. Keating, A. Donaldson, R. Phelan, H. Covey, J. Miller, and G. McKee.
Third row: J. McCarthy, J. Schultz, C. Barrenbrugge, A. Cantin, J. Micklitsch, F. Florik, F. Hart, and J. Eberl.

NEWMAN CLUB

The Newman Club, composed of thirty Catholic members of Tri-State College, has progressed rapidly during the present school year.

Father Ambrose Finnegan, who came to Angola in September, 1931, as an instructor at St. Anthony Novitiate, assumed the duties of club chaplain, relinquished by Father Theodore Fettig on the occasion of his transfer from Angola.

Much credit is due charter members William Porter and Alfred Skotty of the graduating class for their constant interest in the advancement of Newmanism.

William Porter was the delegate to the Ohio Valley Province Convention which was held last November at Cincinnati. This convention saw fit to honor our club by electing William Porter to the office of Treasurer of the Ohio Valley Province.

A Communion breakfast and banquet are held each term, at which prominent speakers are provided, affords religious and educational opportunities to the members.

The Newman Club dance and card party, held at Pottawatomi Inn on April 21, was an outstanding event and a noteworthy achievement of the present school year.

Left to right, first row: Triplett, Sobocinski, Yule, Reigbard, Mrs. Reigbard, Prof. Hoke, Wiedly and Croop.
Second row: Thompson, Allenbrook, Lewis, Adams, Smyers, McKinney, Servis, Branstetter and Blum.
Third row: Masters, Baker, Fisher, Orr, Kramer, Barbour, Fisher, Hosmer, and Lee.

COMMERCE CLUB

During the fall of 1928 the Commerce Club made its appearance at Tri-State College. It was organized in order that the students attending the School of Commerce might have an opportunity to express themselves as a group. Although four years is a comparatively short time, 1932 finds this organization a most active and inspiring intellectual and social club.

This rapid growth and the worthwhile achievements of the club are due not only to the wise leadership and loyal efforts of the officers in charge, but to the enthusiastic cooperation of the members themselves. The officers for the Spring Term, 1932, are as follows: Wayne Smyers, President; George Weidley, Vice President; Horace Keltner, Secretary; R. E. Lewis, Treasurer; Jack Weil, Chairman Executive Committee.

Five meetings were held each term, at which times outside speakers of prominence addressed the group on problems of actual life as associated with the theories taught. Select entertainment was also a feature of each meeting.

At the last meeting of the Winter Term, Dean Lindstrom presented to Mr. R. L. Thompson a Membership Key of the National Institute of Credit for outstanding accomplishment in the study of Credits and Collections.

The Annual Spring Banquet and Dance, held Saturday night, May 14, at Pottawatomi Inn, was a delightful success and an outstanding social event of the year.

We contemplate an even greater program each term and sincerely hope those who carry on will maintain a Commerce Club to which Tri-State will continue to point with pride.

Scholars are men of peace; they bear no arms, but their tongues are sharper than the sword; their pens carry further and give a louder report than thunder.

Sir Thomas Browne.

PROF. HANDY

FACULTY ADVISORS

Engineers in the making do not give the fullest thought to all of the finer things that are to be had. Our faculty advisors have proved themselves of the utmost of value to the staff in the publication of this book. Students in an engineering school are continually thinking in terms of higher mathematics—our book must contain some of the side lights of the school life.

Prof. Parrott, head of the Department of English, has helped greatly in the literary work. Her efforts were to smooth out some of the rough places.

Prof. Handy, our registrar and treasurer, advised us wisely along the financial path of the road of success.

Prof. Neihous, President of our College, was ready to help at all times, but who ever heard of "Uncle George" not being ready and willing to help?

THE MODULUS OF 1932

The members of the Modulus Staff gladly lend their most sincere efforts and talent to build a book worthy to be dedicated to Dr. Charles C. Sherrard. His summons to the Great Beyond ended the work of one of man's greatest friends—a great educator.

Because he helped to train future engineers, an Engineering Theme is very fitting.

The book being published by the Engineering Society does not limit its contents to works of members only or engineering students. The co-operation of all the students of the college is the secret of the success of this book.

The staff very gratefully extend their most sincere thanks to those who have helped in the publication.

THE INTEGRAL

The Integral has passed another milestone. In spite of its literary shortcomings and other limitations, the hard working staff comprised of fifteen energetic young men, has made this year's Integral one of the best ever published on this campus.

To those not intimately acquainted with the Integral, the history of this student publication may be of interest. The idea of having a technical student publication on the campus was first evolved in the Engineering Society, who is its sponsor. Its main purpose was to create a periodical which would aid the engineering students in expressing themselves in a literary way. It met with instantaneous support. At first contributions were limited to those of a highly technical nature. Keeping step with the modern trend, it now accepts articles ranging from poems, humor and fiction to those of a technical nature. By skillful arrangements of these technical treatises with humor, poetry and fiction, the Integral has become one of the most unique college publications of its kind. We are proud to add that it vies for honors with student publications of larger universities where literary ability is abounding.

In this year's publication of the Integral, we had one of the best issues ever published: The Doctor Sherrard Memorial number. Through the hard work of the editor and his staff, aided by the cooperation of several members of the faculty, this number was a fitting tribute to our late beloved president, Doctor Sherrard.

The work of the Integral staff for the year 1931-32 is done. It was our main purpose to raise the standard of this student publication. We believe we have succeeded. To those who are to fill our positions, we wish them success. The torch is passed.

CAMPUS ACTIVITIES

STUNT NIGHT

The evening of November 2, 1931, marked the celebration of the Tri-State College Annual Stunt Night. Stunt Night, with its colorful parade, its joyous vaudeville performance, and its motley crow of carefree youth typifying the collegiate spirit, is the one night in the school year when books and study are considered of secondary importance.

The Stunt Night program was under the auspices of the Engineering Society of Tri-State College. Charles E. Shank, Coach of the Dramatic Club, was in charge of the vaudeville show; while the Stunt Night Parade was under the direction of Roy Clark.

Activities started with a parade, which was participated in by most of the departments and organizations of the school. The parade was led by the hook and ladder apparatus of the town fire department. Music was supplied by the local American Legion Band. Elaborate, and striking novel floats created by the Departments of Aeronautical, Eelectrical, Civil, Mechanical, Chemical, and Administrative Engineering; the School of Commerce; and the following fraternities: Beta Phi Theta, Phi Beta Epsilon, Delta Kappa, Phi Sigma Chi, Sigma Mu Sigma, Chi Epsilon, Delta Kappa Phi, Phi Iota Alpha, and Tau Sigma Eta. The prize, which was offered for the best appearing float, was won by The Department of Civil Engineering. The prize winning float was a perfect model of a suspension bridge, and had been constructed by the students of Civil Engineering.

The highlights of the evening's celebration was the Stunt Night Show.

The theme of the show was an original Dutch Review written and directed by Mr. Shank.

The prologue of the Stunt Night Show was "What the Moon Saw;" and was enacted by Donald Crisman and Paul E. LaFrance. This was followed by the opening chorus of Dutch boys and girls, continuing with a cheer for Tri-State College by the College Men and Co-eds.

The famous French farce, "Master Pierre Patelin the Lawyer" was played in real professional manner by the following cast: The Judge, played by Osmund Wiger; Patelin the Lawyer; Guillmett his wife, by June Gordon; Giulloume the Daprer, by John Prenzlau; and Tibauld the Shepherd, by Donald Crisman.

Several delightful selections were given by Merton Crandall on the saxophone and Hans Berg on the accordion; as well as vocal numbers by Billie Caler, Frank Stevens, Minard Rose, and Marie Snyder.

A unique sketch, "The Sightseers," was given by the following cast: Ma, played by Phylis Tritch; Pa, by Edward Gilcher; Bride, by Malinda Shank; Girl by Ruth Dunlap; Groom, by A. M. Hunter; Caller, by Max Shaperio; and Driver, by T. Sebastiano.

A short talk was delivered by Walter E. Peterson, President of the Engineering Society. Mr. Peterson welcomed those present; and explained the tradition of Stunt Night at Tri-State College.

A humorous and rather romatic skit, "Social Engineering," was enacted by Donald Crisman, Charles Ganss, June Gorden, Vivian Dolph Mary Wisman, Emily Croxton, Anna Mary Luse, Kathryn Miller, and Phylis Tritch.

The show was concluded by a comic sketch, "The Faculty Banquet." Various members of the cast impersonated the faculty in a rather grotesque manner, casting dignity and restraint to the winds. The results were so hilarious, however, that victims of the impersonation could not help but join the general appreciation of the humor.

The cast was as follows: Dutch Boys: Miles Blanchard, Billie Caler, Had Chaffin, David Dober, Gordon Fogle, Judson Harmon, Charles Kayhart, Walter Klein, John Robinson, Dave Shumaker, Frank Stevens, Carl Widdowson; Dutch Girls: Emily Croxton, Vivian Dolph, Lucille Ensley, Betty Faulkerson, Margaret Field, Anna Mary Luse, Barbara Parsell, Ava Shank, Evelyn Tritch, Mavine Van Gilder, Helen Wert, Mary Wisman; College Men: Frank Ford, Wayne Frisch, Stillman Groves, Sidney Hawkinson, Paul LaFrance, Dudley Moulton, Arthur Muir, John Pappas, Bud Straub, M. Strous, Larry Wharton, Harold White; Co-eds: Helen Casebeer, Catherine Coe, Martha Fisher, Pauline Fisher, Vivian Holderness, Frances King, Louise Kratz, Virginia Kratz, Kathryn Miller, Rolene Rowley, Marie Snyder, Phylis Tritch.

The Stunt Night Show Committee, which so capably carried out their duties, consisted of the following: Wilson Webster, Dick Jones, Arthur Duckwall, Thomas Hettema, Jack Morehouse, Billy Caler, Miler Blanchard, Carl Rhine, Jules Cullen, Leonard Subber, George Bosch, Leonard Geiger, and Eleanor Tarbell.

First row: J. A. del Valle, D. Maple, E. Hancock, H. Lempkin
Second row: R. Thomson, J. Cullen, R. Fenwick.

ANNUAL BANQUET OF THE ENGINEERING SOCIETY

The social apex of the scholastic year, namely the banquet and dance which is conducted by the Engineering Society of Tri-State College, was held Saturday evening, February 20th. This banquet is given in honor of the faculty, alumni, and students of Tri-State College.

This year's banquet was under the capable management of R. O. Fenwick; who was assisted by the following members of the Banquet Committee: E. D. Hancock, J. A. del Valle, R. T. Thomson, D. E. Maple, H. J. White, J. A. Cullen, H. J. Lempkin.

Professor Walfred Lindstrom, Dean of the School of Commerce ,acted as toastmaster; introducing Professor Burton Handy who delivered a very pleasing invocation. An address of welcome was given by Wilson Webster, president of the Engineering Society. Doctor C. C. Sherrard, president of Tri-State College, gave a brief welcome to the alumni who had come from many distant cities to attend this event.

The speaker of the evening was Professor Arthur Holmes, of the department of Psychology at the University of Pennsylvania. Professor Holmes, who is a nationally known lecturer, spoke on the subject of making the most out of a college life: as well as deriving the maximum happiness and success during the student's post scholastic days. His talk was liberally sprinkled with psychological examples, which were both amusing and highly instructive. The entire attendance acknowledged this fine address by a vigorous and continued applause.

The remainder of the evening was given over to dancing. The dance, with its assembly of beautifully gowned women and their student escorts, capped the climax of a perfect and highly successful banquet.

A picture is a poem without word.

THE OPTIMIST

His horse dropped dead and his mule went lame.
And he lost three cows in a poker game;
Then a cyclone came on a summer's day
And carried the house where he lived away;
Then the tax collector, he came around
And charged him up with a hole in the ground;
Then the village marshal, he hove in view
And made him settle his street tax, too.
Did he grieve when his old friends failed to call,
When the cyclone came and swallowed all?
Did he moan or sigh; died he weep or cry?
Did he curse the hurricane sweeping by?
No! No! No! He climbed the hill
Where standing room was left him still,
And taking his hat from his old bald head,
With pose sublime, he gently said:
"The last six months have been bad, you bet,
But thank the Lord, I haven't the small-pox yet."

OPPORTUNITY

Master of human destinies am I.
Fame, love, and fortune on my footsteps wait.
Cities and fields I walk; I penetrate
Deserts and seas remote, and passing by
Hovel, and mart, and palace—soon or late
I knock unbidden once at every gate.

If sleeping, awake—if feasting, rise before
I turn away. It is the hour of fate,
And they who follow me reach every state
Mortals desire, and conquer every foe
Save death; but those who doubt or hesitate,
Condemned to failure, penury, and woe,
Seek me in vain and uselessly implore—
I answer not, and I return no more.

THINK RIGHT

If you think you are beaten, you are;
If you think you dare not, you don't.
If you'd like to win but think that you can't
It's almost a cinch that you won't.
If you think you'll lose, you're lost,
For out of the world we find
Success begins with the fellow's will,
It's all in the state of mind.

If you think you're outclassed, you are:
We've got to think high to rise;
You've got to be sure of yourself before
You can ever win a prize.
Life's battles don't always go
To the stronger or fastest man;
But soon or late the man who wins
Is the man who thinks he can.—*Selected.*

RAINBOW BEAUTY SHOPPE

:—:

The Shoppe that gives Satisfaction

I wish I was a little rock,
A sittin' on a hill,
With nothin' to do all day long
But just a sittin' still.
I wouldn't work, I wouldn't fret,
I wouldn't even wash;
I'd just sit still a thousand years
And rest myself, by gosh!—*Anon.*

The horse and cow live thirty years,
They never touch light wine or beers.
Sheep and goats are dead at twenty,
They drink no hooch, but water plenty!
At ten the cat has lost nine lives,
No beast on milk and water thrives,
At five the birds are mostly dead,
They look not upon the wine that's red.
A few days bugs may stay on earth,
They do not know the cocktails worth.
But the awful, wicked, rum-soaked men,
Live on for three score years and ten.—*Anon.*

THREE POEMS

By Some Dammed Moron

Woman:
Dry eyed, her sobbing stilled
A little girl look at
A broken doll. Some day she
Will scrub floors in the
City Trust Building.

Art:
High up under a dirty skylight
In a room full of
Paint smeared canvas.
An Artist
Shares his last sardine
With a cat. The sardine
Is poisoned.

The Law:
A fat man in a blue suit
Goes officeward under
A derby hat
And smiles smugly when
Someone says,
"Good morning, chief."

ANGOLA TENT and
AWNING CO.

Tents (rented) Awning

How well do I remember, 'twas in the late November
I was walking down the street quite full of pride,
My heart was all a-flutter, as I slipped down in the gutter,
And a pig came there and laid down by my side.

And as I laid there in the gutter, all too soused to even mutter,
A lady passing by was heard to say,
"One may tell a brute that boozes, by the company he chooses,"
Hearing this the pig got up and walked away.
